

WE ARE

FADESA

We transform the industry
to elevate those who transform
the world since 1956

Our production processes are carried out with state-of-the-art technology in a clean and and responsible way.

We adjust to our customers' needs and requirements providing them with regular and effective assistance.

We manufacture plastic and metal packaging solutions for the following segments:

Food

Industrial

Beverages

Agrochemical

Pharmaceutical and Cosmetics

Printing Systems

Offset Printing System

We have an offset printing system to print up to 4 direct colors. This technology offers high printing quality and definition. Available for all formats and capacities of buckets, containers and lids.

IML Printing System

We have a state-of-the-art automated in-line injection molding (IML) label adhesion system.

The IML system allows to obtain:

- High Definition Colors. We can print up to 8 Colors.
- Better details in the printing artwork.
- More durability

Available for 3.5L, 3.78L, 4L and 18.9L buckets.

Serigraphy

We have a printing system that offers quality and long life. Available for all formats and capacities of containers and lids.

Services

Cuting and Varnishing Service

Coil cutting service and varnishing for tinplate sheets adjusted to different widths and lengths.

Offset Printing Technology

We have the latest offset technology or printing on metal containers, flat ends, easy open ends, aluminum tubes and crown caps.

TECHNICAL AND AFTER-SALES SERVICE

We have about **20 technical advisors** in all our locations (**Ecuador-Peru-Colombia**) that provide periodic technical and after-sales assistance to our customers.

Our team is **highly trained** to meet the maintenance and quality control requirements that **guarantee** the high performance of the containers in the multiple processes of our customers.

Our technical and after-sales service includes:

METAL PACKAGING DIVISION

Technical assistance on the use of the containers purchased.
Periodic visits that allow us to:

- Monitor the performance of the container in the closing and filling process.
- Optimize the quality of our services and products through constant communication with our customers.
- Provide advice on seaming machines.
- Overhauls and repairs of seaming machines.
- Support in the development of new products for our customers.
- Continuous evaluation of the packaged product to verify the performance of the containers and lids.
- Technical training.

TECHNICAL AND AFTER-SALES SERVICE

Plastic Packaging Division

Periodic visits that allow us to:

- Monitor the performance of the container in the closing and filling process.
- Optimize the quality of our services and products through constant communication with our customers.
- Support in the development of new specifications required for our customers' products.
- Technical talks on the proper use of packaging.

Tools and Equipment

- We have a specialized workshop for metal packaging that manufactures the appropriate tools for our customers' seaming machines to fit our containers.
- We provide technical assistance in the acquisition of container seaming machines.
